Anri Tsetskhlashvili

Full-stack Developer

ABOUT ME

I am a passionate and results-driven Full Stack Developer with a strong foundation in modern web technologies and a keen eye for intuitive design. Specializing in React on the frontend and expanding my backend expertise—primarily with Node.js, along with C# and Microsoft Azure. With hands-on experience in tools like Tailwind CSS, styled-components, Framer Motion, Firebase, and Figma, I deliver both technical precision and visual appeal across the stack. My focus is on building scalable, maintainable, and innovative web applications that bridge frontend interactivity with robust backend systems. I strive to deliver complete solutions that are not only visually engaging but also technically sound, secure, and aligned with business goals.
